ANA Convention, 1992

AMERICAN NUMISMATIC ASSOCIATION 101ST ANNIVERSARY CONVENTION

SPECIAL TEC CONVENTION ISSUE

From the President's Desk

We are pleased to have a part in the 101st ANA Anniversary Convention; the "AmericANA Coin Show: A World's Fair of Money."

We plan all year for this convention and look forward to the activities connected with it. Our involvement in producing the Official Elongated Coin for the show has made it even more pleasurable. This first started in 1989 at Pittsburgh, then at Seattle, next at Chicago and now here in Orlando. Carting my machine here and there across the country has created some problems, but believe me, it has been worth it. It has helped to create activity at our booth unmatched at any other table on the Club Midway. Our booth is no longer just a meeting place for weary club members. It is a den of activity. The general public gather around to pick up free coins and to buy souvenirs. Some are fascinated to watch them being produced. We offer to roll coins from their pocket change and take the opportunity to demonstrate, answer questions, and explain our hobby. We also encourage them to join our organization. All of this has helped our membership and our treasury grow as it has never grown before.

In addition to the above, it still provides a

friendly meeting place for our members. It is exciting when a stranger steps up and introduces him/herself as a member that you have corresponded with many times but never met before.

President's Desk (From Page 1)

In my opinion, meeting new friends is one of the major advantages of having the convention in a different part of the country each year. Of course, it is also a pleasure to meet many old friends that are perennial convention attendees.

Of course, none of this would be possible without officers and members who volunteer to help with the work. It is a busy time — **Having So Much FUN!**

Located elsewhere (Page XX) in this issue is an illustrated page describing all of the official TEC Elongates produced for the ANA Convention and the membership. A price list is also provided.

In addition to the above, I am sure that many commemorative, advertising and personal elongated coins will be available elsewhere on the bourse floor. Check them out for yourself or check at our table and we will tell you where they can be obtained.

I am sorry to say that the Enameled Badge rolled on a silver quarter was sold by advance order only. They were again made by Bert Samsa of Fairbanks, Alaska. The workmanship is beautiful and the only one available will be offered in the TEC Auction to be held after our membership meeting.

Speaking of our Meeting: The TEC Board Meeting will be held at 9:30 AM, Friday, August 14, 1992 in Room #22. The TEC Membership meeting will follow in the same room at 11:00 AM. Please make plans to attend the membership meeting and present your ideas for improving our hobby.

The auction will follow the general membership meeting and promises to be a highlight. The Enameled Silver Badge will be the featured items, however many other very interesting items will be on the docket. We will be striving to surpass the \$400.00 mark and beat the record proceeds established in 1991. Remember all items are donated and all proceeds go to the TEC Treasury. SO — please bid generously.

Special attractions at the TEC Booth: The talented Jim Dundon will be on hand to demonstrate his Elongated Machine which offers a selection of any one of eight different designs. Jim not only manufactures his machines, he is also a designer, engraver, roller and dealer of Elongated Coins. I guess you could say "He does it all!"

Angelo Rosato's book *"The Encyclopedia of the Modern Elongated"* along with his recently published supplements will be on display and available for ordering.

Elongated 2x2 coin holders and other speciality items

will also be available at our booth including a very limited edition of a special coin featuring Christopher Columbus and rolled on numbered Columbian and Kennedy half dollars. This is a personal issue with permission granted to me by the ANA. In appreciation I have rolled a very special coin that will only be distributed to those attending the Saturday night banquet.

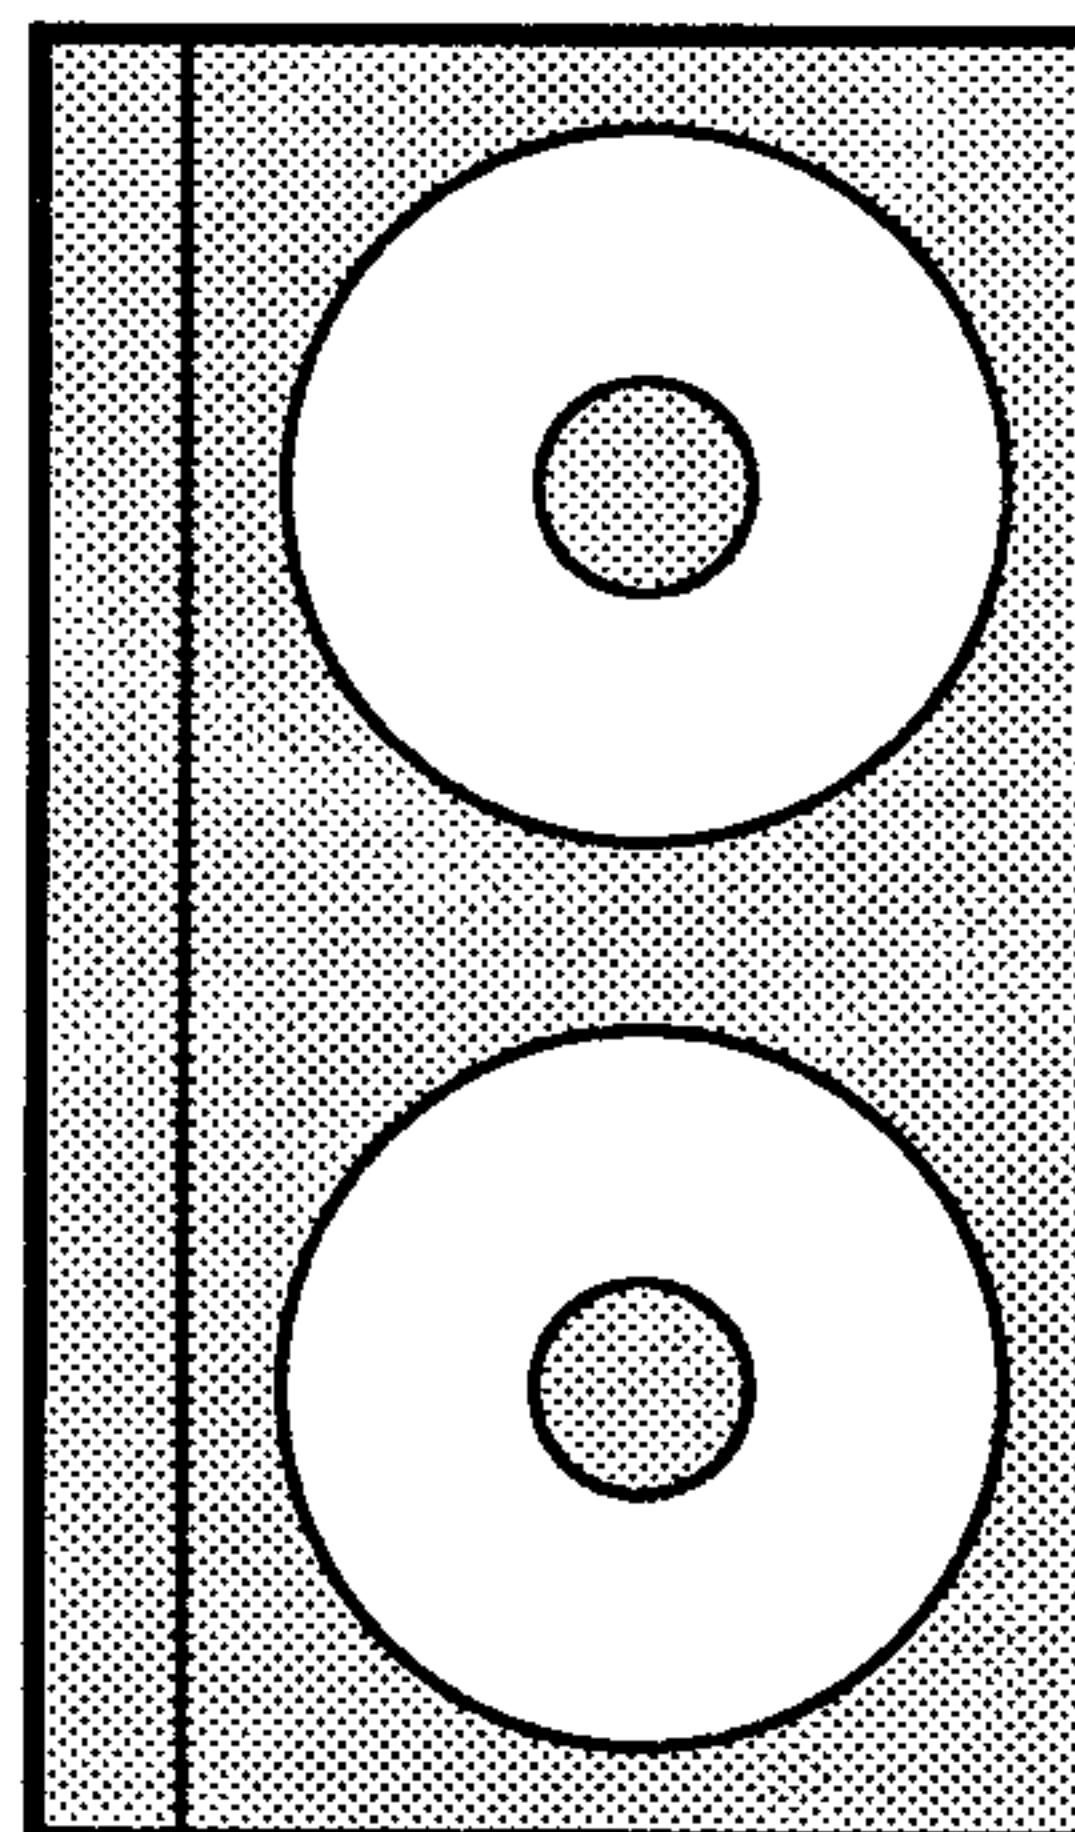

Special Note: TEC will be honored at the Awards Meeting for being an ANA member for 25 continuous years. It has been planned that Gus Meccarello and I will accept the award: Gus as a Charter Member and myself as the current President.

ENJOY this Special Edition of TEC News. It is only a sample of the high quality and informative newsletter that we publish quarterly. If you are a member — GREAT!! If not we hope that you will fill out and turn in the membership application that is included in this issue.

Let's end this message on a positive note. I am glad to be here. I am glad that you are too and I truly hope that you "Find Your Treasure in Orlando!" If not on the convention floor, then certainly at one of the many tourist attractions in the area. *Enjoy YOUR Convention!*

★ ★ **WANTED** ★ ★

TEC is in need of a member to volunteer for the position of TEC SECRETARY. Please contact Ray Dillard if you are interested We need YOUR help!

TEC Video Library

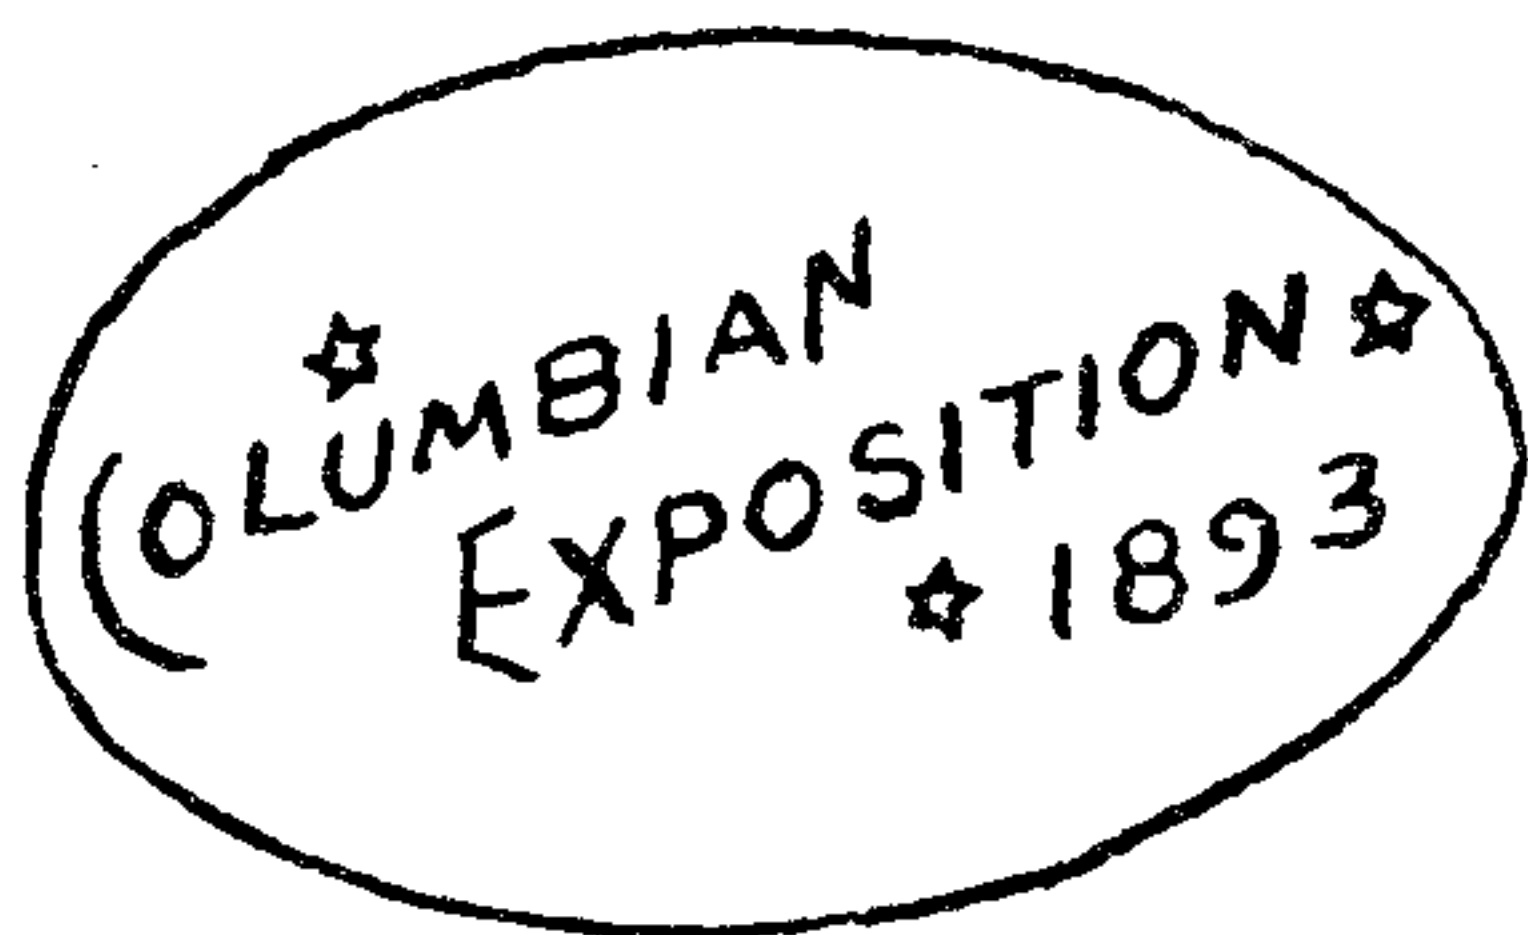

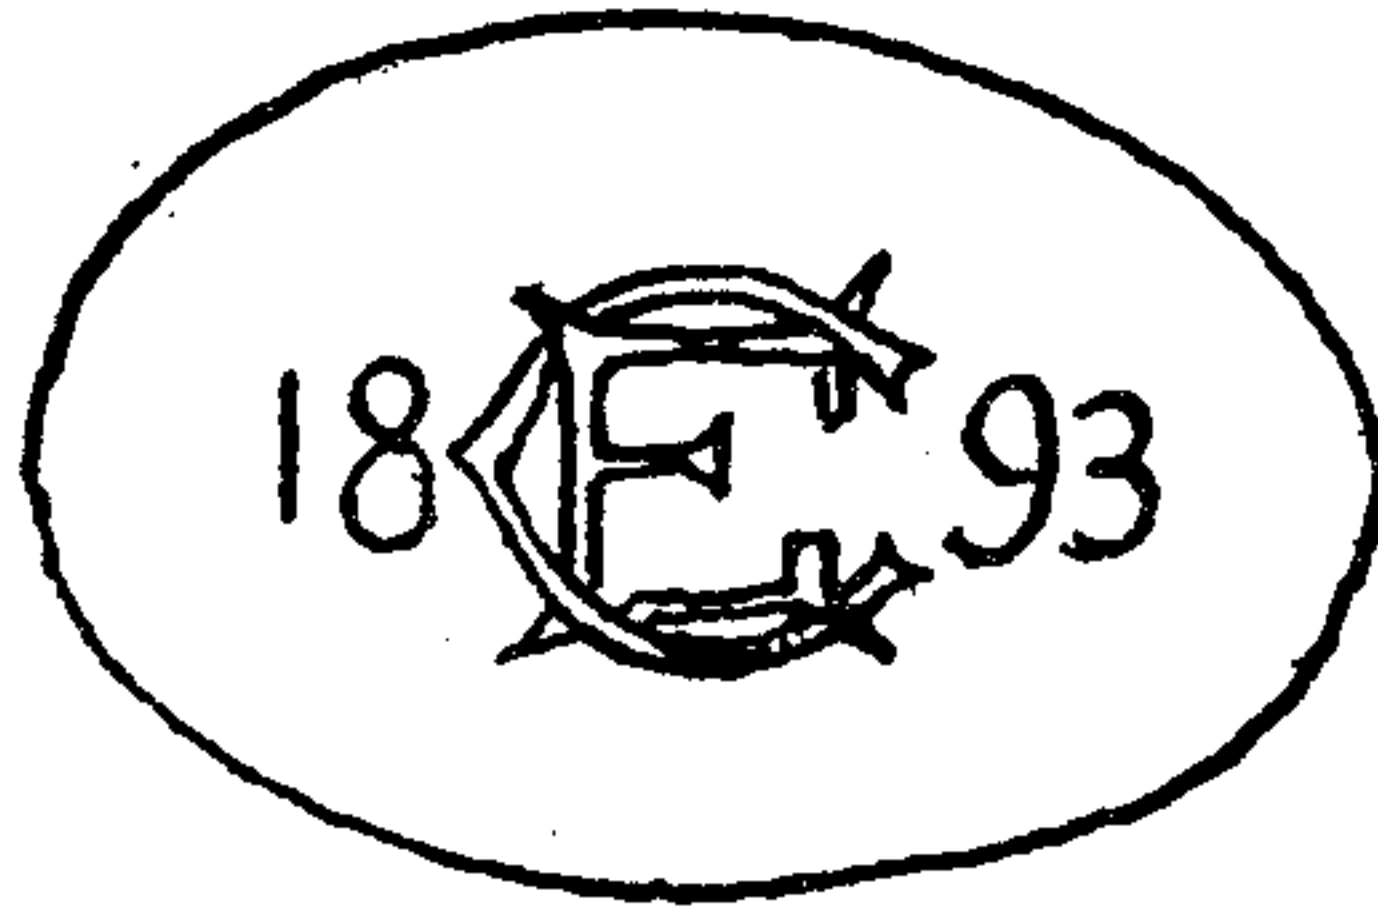

The following VHS tapes are available on loan: **"The Elongated Collectors"** and **"Making of a Steel Die."** The rental price for both is \$10.00 plus the cost of return postage. Address your request to Ray Dillard, P.O. Box 161, Fenton, MI 48430.

ELONGATED COINS

It is generally accepted that rolling of elongated coins in the United States began at the World's Columbian Exposition held in Chicago, Illinois in 1892-93. Elongated coins are coins rolled through hand cranked machines consisting of reverse-engraved dies cut in steel rollers, similar in concept to wringers on old fashioned washing machines. Regular coins are run through the rollers under tremendous pressure, which passes the coin into the die and due to the pressure, stretches the coin into an oblong or egg shape in the process.

Elongated coins come in all denominations plus tokens and foreign coins with the one cent piece being by

far the most common. It is not illegal to make elongated issues on U.S. coins. Although SECTION 331, TITLE 18 of the U.S. Code prohibits the

fraudulent alterations and mutilation of U.S. coins, the statute does not prohibit mutilation of coins if done without fraudulent intent or use.

With the start as a money making souvenir at world fairs or expositions, the elongated coin has evolved into mementos for most any event, activity or topic. Many more are used as store or personal cards. Prices of elongated coins vary depending on number rolled, age, denominations, popularity of topic or event, even condition of the coin. There four books available which catalog elongated coins. These books are: **The Elongated Collector**, by Dottie Dow, published in 1965, **Today's Elongateds** by Lee Martin, published in 1974; **Yesterday's Elongateds**, by Lee Martin and Dottie Dow, published in 1981 and also the **Encyclopedia of the Modern Elongated**, published by Angelo A. Rosato, published in 1990.

Modern elongateds are rolled and sold at many events, fairs, shows and other activities. The more

common and numerous modern elongateds sell for between 50¢ and \$1.00 when not used as free hand-outs. Older elongated coins are found at coin shops or shows, flea markets, even at garage sales. Prices on the older issues are generally a little higher. It is estimated there are a thousand elongated coin collectors with large general collections and thousands more who collect topical or specialty elongateds.

Several die designers and talented engravers are commercially available at a moderate cost of \$50 to \$75 per die. There are over 100 active "rollers" in the U.S., many whom will roll coins for you at nominal cost. There are a small number of dealers in Americana

Exnumia who also issue catalogs and sell elongated coins by mail or auction. Also a number of major collectors or rollers occasionally publish lists with prices of elongated coins they are willing to sell. TEC

Designing Your Own Elongated Coin

By Don A. Wilkinson, TEC No. 1079

I have learned during the time that I have been into elongated coins that I get a tremendous feeling of satisfaction in conceiving an idea for a coin and working out the details of the design. When the completed coin arrives, what a great thing of beauty, joy and pride of accomplishment! As a collector, I believe you are somewhat unfulfilled until you do your own coin.

I'd like to outline a few things to consider in doing a coin:

★ Do a coin on an event or activity that you know something about. If you don't research the activity so the theme, logo design, slogans or sayings are authentic and recognizable as being relevant to the event or activity.

★ Keep the design simple and uncluttered as possible; this is going to be your biggest problem. Simple single line drawings are best, like those in a childrens coloring book.

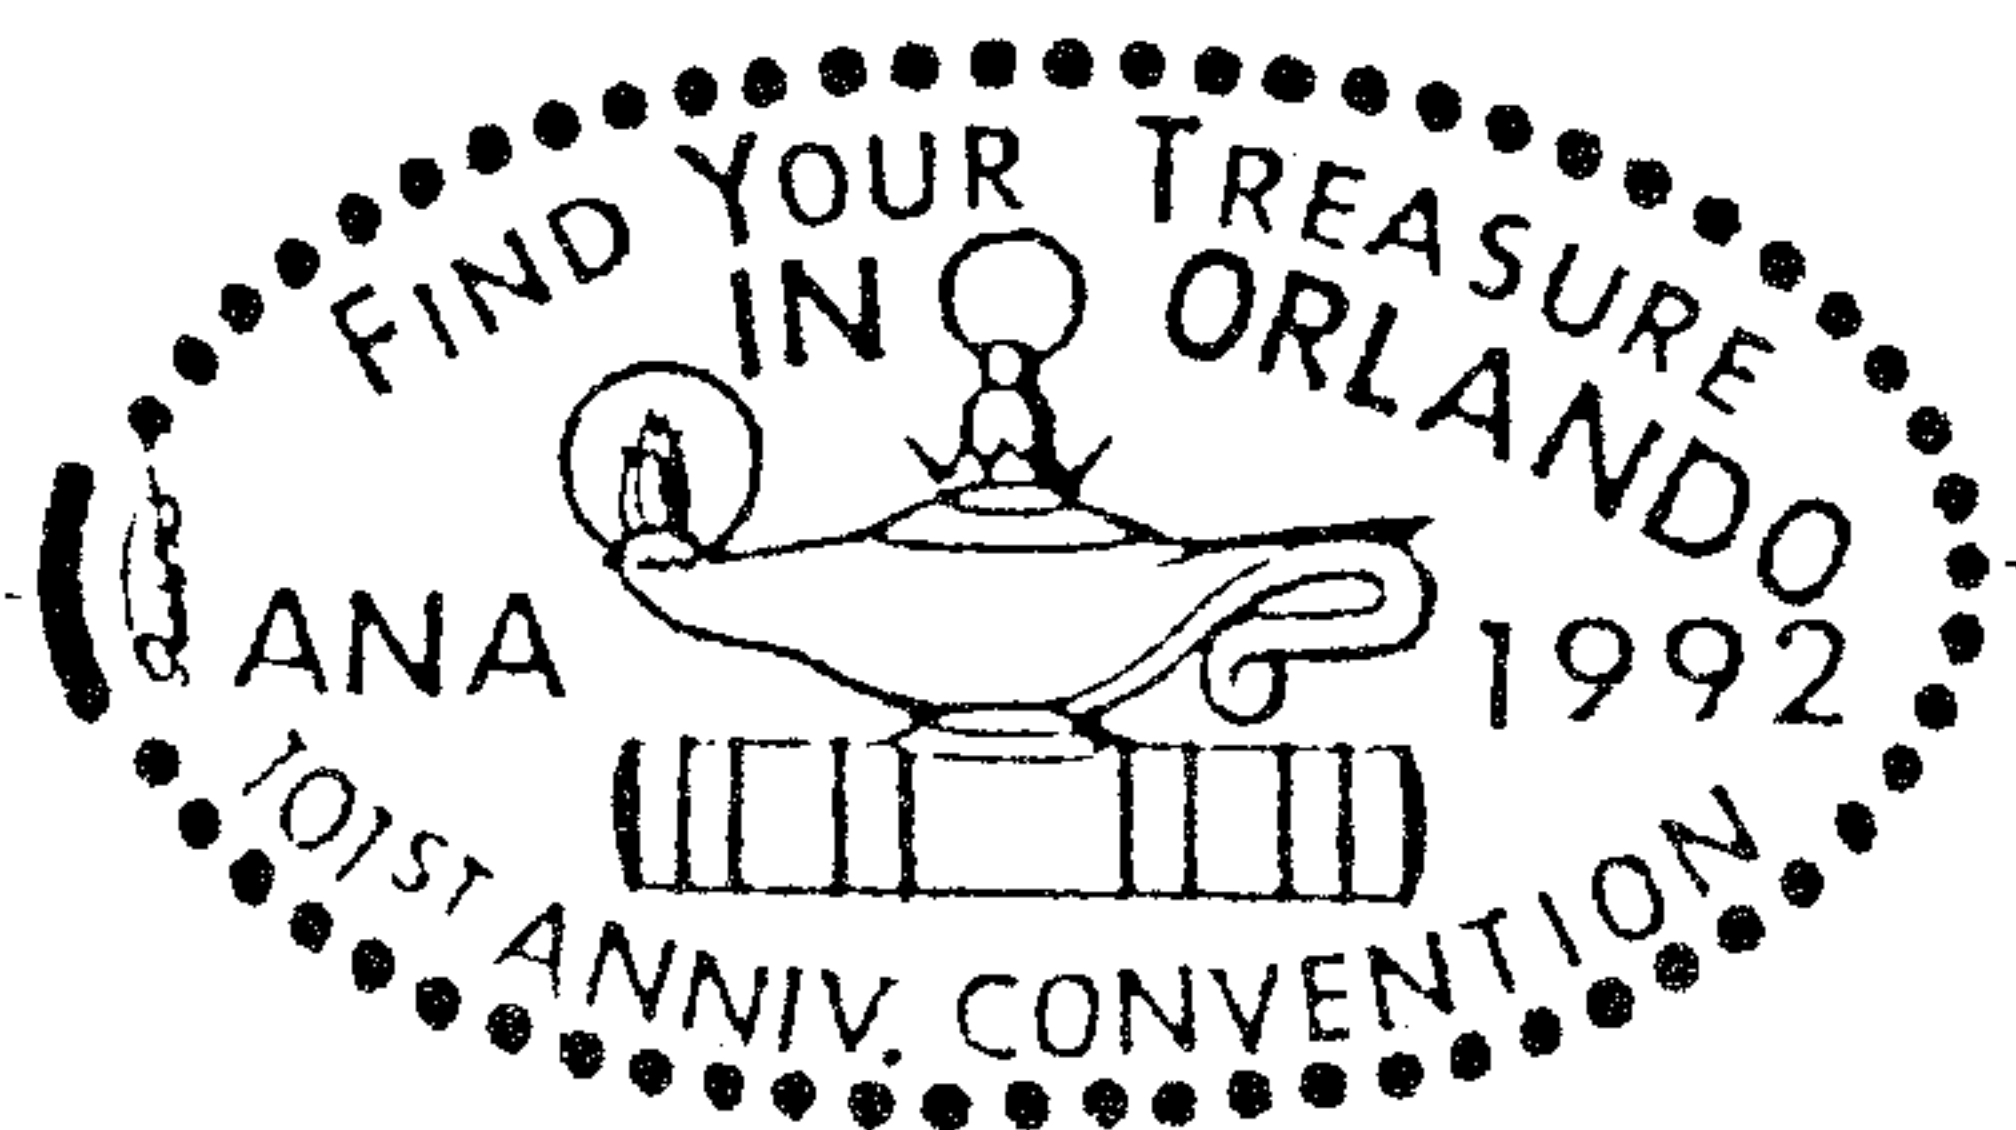

Continued on Page 10

SPECIAL ISSUE ELONGATED BADGES AND COINS FOR 1992

The 1992 Badge, pictured here, was issued in two varieties. The regular issue, rolled on a clad quarter, selling for \$6.00 each, and the enameled issue, rolled on a silver quarter, selling for \$22.00 each. Both are suspended by a ribbon. The regular issue will be limited to 100 and the special enameled issue was limited to advance orders of 31. The regular badges are still available. The enameled badges are sold out.

The official ANA Convention design rolled on cents, nickels, dimes, quarters and half dollars. This design will also be rolled on customers' pocket change during the convention. Cents are available at 50 cents each plus S.A.S.E. This design is also available in 6-coin sealed sets.

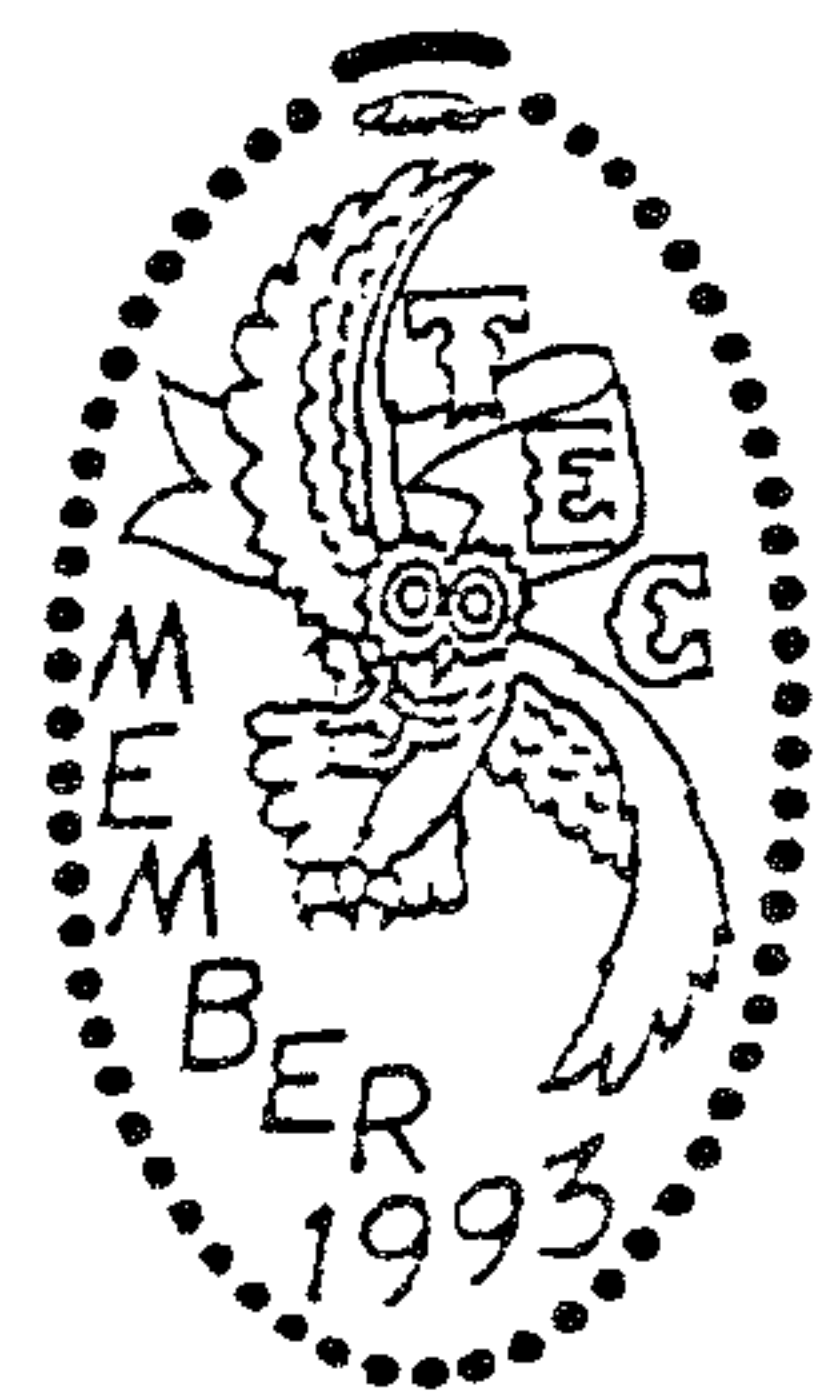

The TEC Convention free hand-out coin (Rolled on cents) is a smaller version of the TEC badge design. This design was also rolled on nickels, dimes, quarters, and half dollars. Cents available at 50 cents each plus S.A.S.E. This design is also available in 6-coin sealed sets. This design will also be rolled on customer's pocket change during the convention.

The following coins were designed for the TEC membership...

The Merit Award coin was rolled on silver quarters with a serial number on the reverse.

The Newsletter Article Award coin was rolled on nickels and was presented to eligible members after the end of 1992.

The 1993 Membership coin will be rolled on cents and presented to each member with their 1993 membership card.

The Official ANA Convention elongated coins - will be available at the TEC Booth or they may be ordered while supply lasts from the President, Ray Dillard. Currently available are:

1. Regular TEC Convention badge (limited Number) at \$6.00 each postpaid.
2. Convention Sets (6 Coins) \$6.00 plus \$1.00 postage - \$7.00 total.
3. ANA - TEC Convention coin 50 cents plus S.A.S.E.

Note: Each mail order will receive one of the TEC Hand-out coins.

BOOKS ...

KEY TO KNOWLEDGE

--- by Angelo A. Rosato ---

Perhaps ignorance, unawareness, or obscurantism are but a few scholastic words to describe what has been the unfortunate past situation in the elongated coin hobby when it came to not knowing the answers to some very important questions since the modern revival of elongateds beginning in the 1960s.

It is with certainty that the elongated hobbyist has for a long time acknowledged the important and significant need for printed guides and reference volumes on the subject of elongated coins. The collector has for an extended period in time been confronted with the lack of vital, proven and factual information. There were, in earlier days, some meager fundamental and uncritical, one-dimensional listings lacking in depth and thoroughness concerning the elongateds. Later, up to 1979, there was some attentiveness through two or three published works: each a courageous effort and very much accepted. In them, however, there was an element of speculative and vagueness in many areas within the proficiencies to various elongateds. There was a definite need for a more in-depth enlightenment encompassing *all facets* connected to the elongateds and the hobby.

For a span of almost three decades there has not been a comprehensive, informative, complete, or classic publication. However, the two major works by Dottie Dow and Lee Martin & Dow have been most indispensable. As a point of interest, these books have been the essential, integral and a significant influence in the survival of elongateds during the struggling growth of the hobby.

The answer to knowledge is simply through the use of books: not only for the books that are readily available...,but to review new or upcoming volumes that excel, improve or upgrade new elongated coin information not previously known. - The hobbyist must shun any idea that books are not important. One must remember the old adage; *"BUY THE BOOK BEFORE THE COIN,"* a principle generally accepted as wise in the realm of numismatics. The investment, regardless of expense or sacrifice sustained in the accomplishment of a purchase, can only result in untold benefits, which may contribute to monetary gain, or a boon in personal quality knowledge. - Without books only

whimsical, speculative or imaginative thoughts could tragically deviate from a particular meaningful direction: or worse still, to cause a departure from the true facts. This, then, can only provoke failure and a downfall for any hobby. Books and more books, therefore, have the resources to realities, truths, statistics, particulars, and specifics. Books may also scan areas of proven actualities, accuracies, and authenticities.

Having confronted the perplexities of putting together an all-encompassing work on the subject of elongated coins for more than 22 years, the *"ENCYCLOPEDIA OF THE MODERN ELONGATED"* is a book that has become the latest reality in the hobby. Through this, this author has expressed an important response towards the interest in good elongated coin books. The statement is not with reservation, as the conviction is totally true. - Lee Martin, the author of elongated books, has long known the labor and herculean endeavor in the above named publication applicable to the "modern" elongateds. Both Martin and this author in their work have converged in a lacework of the "oldie" and the "new" production issued elongateds. Both writers understood the exertion and complexities of the work. Each book (although dissimilar in content), was intended in mind as a goal for the purpose of instilling knowledge about a specific subject: elongateds!!

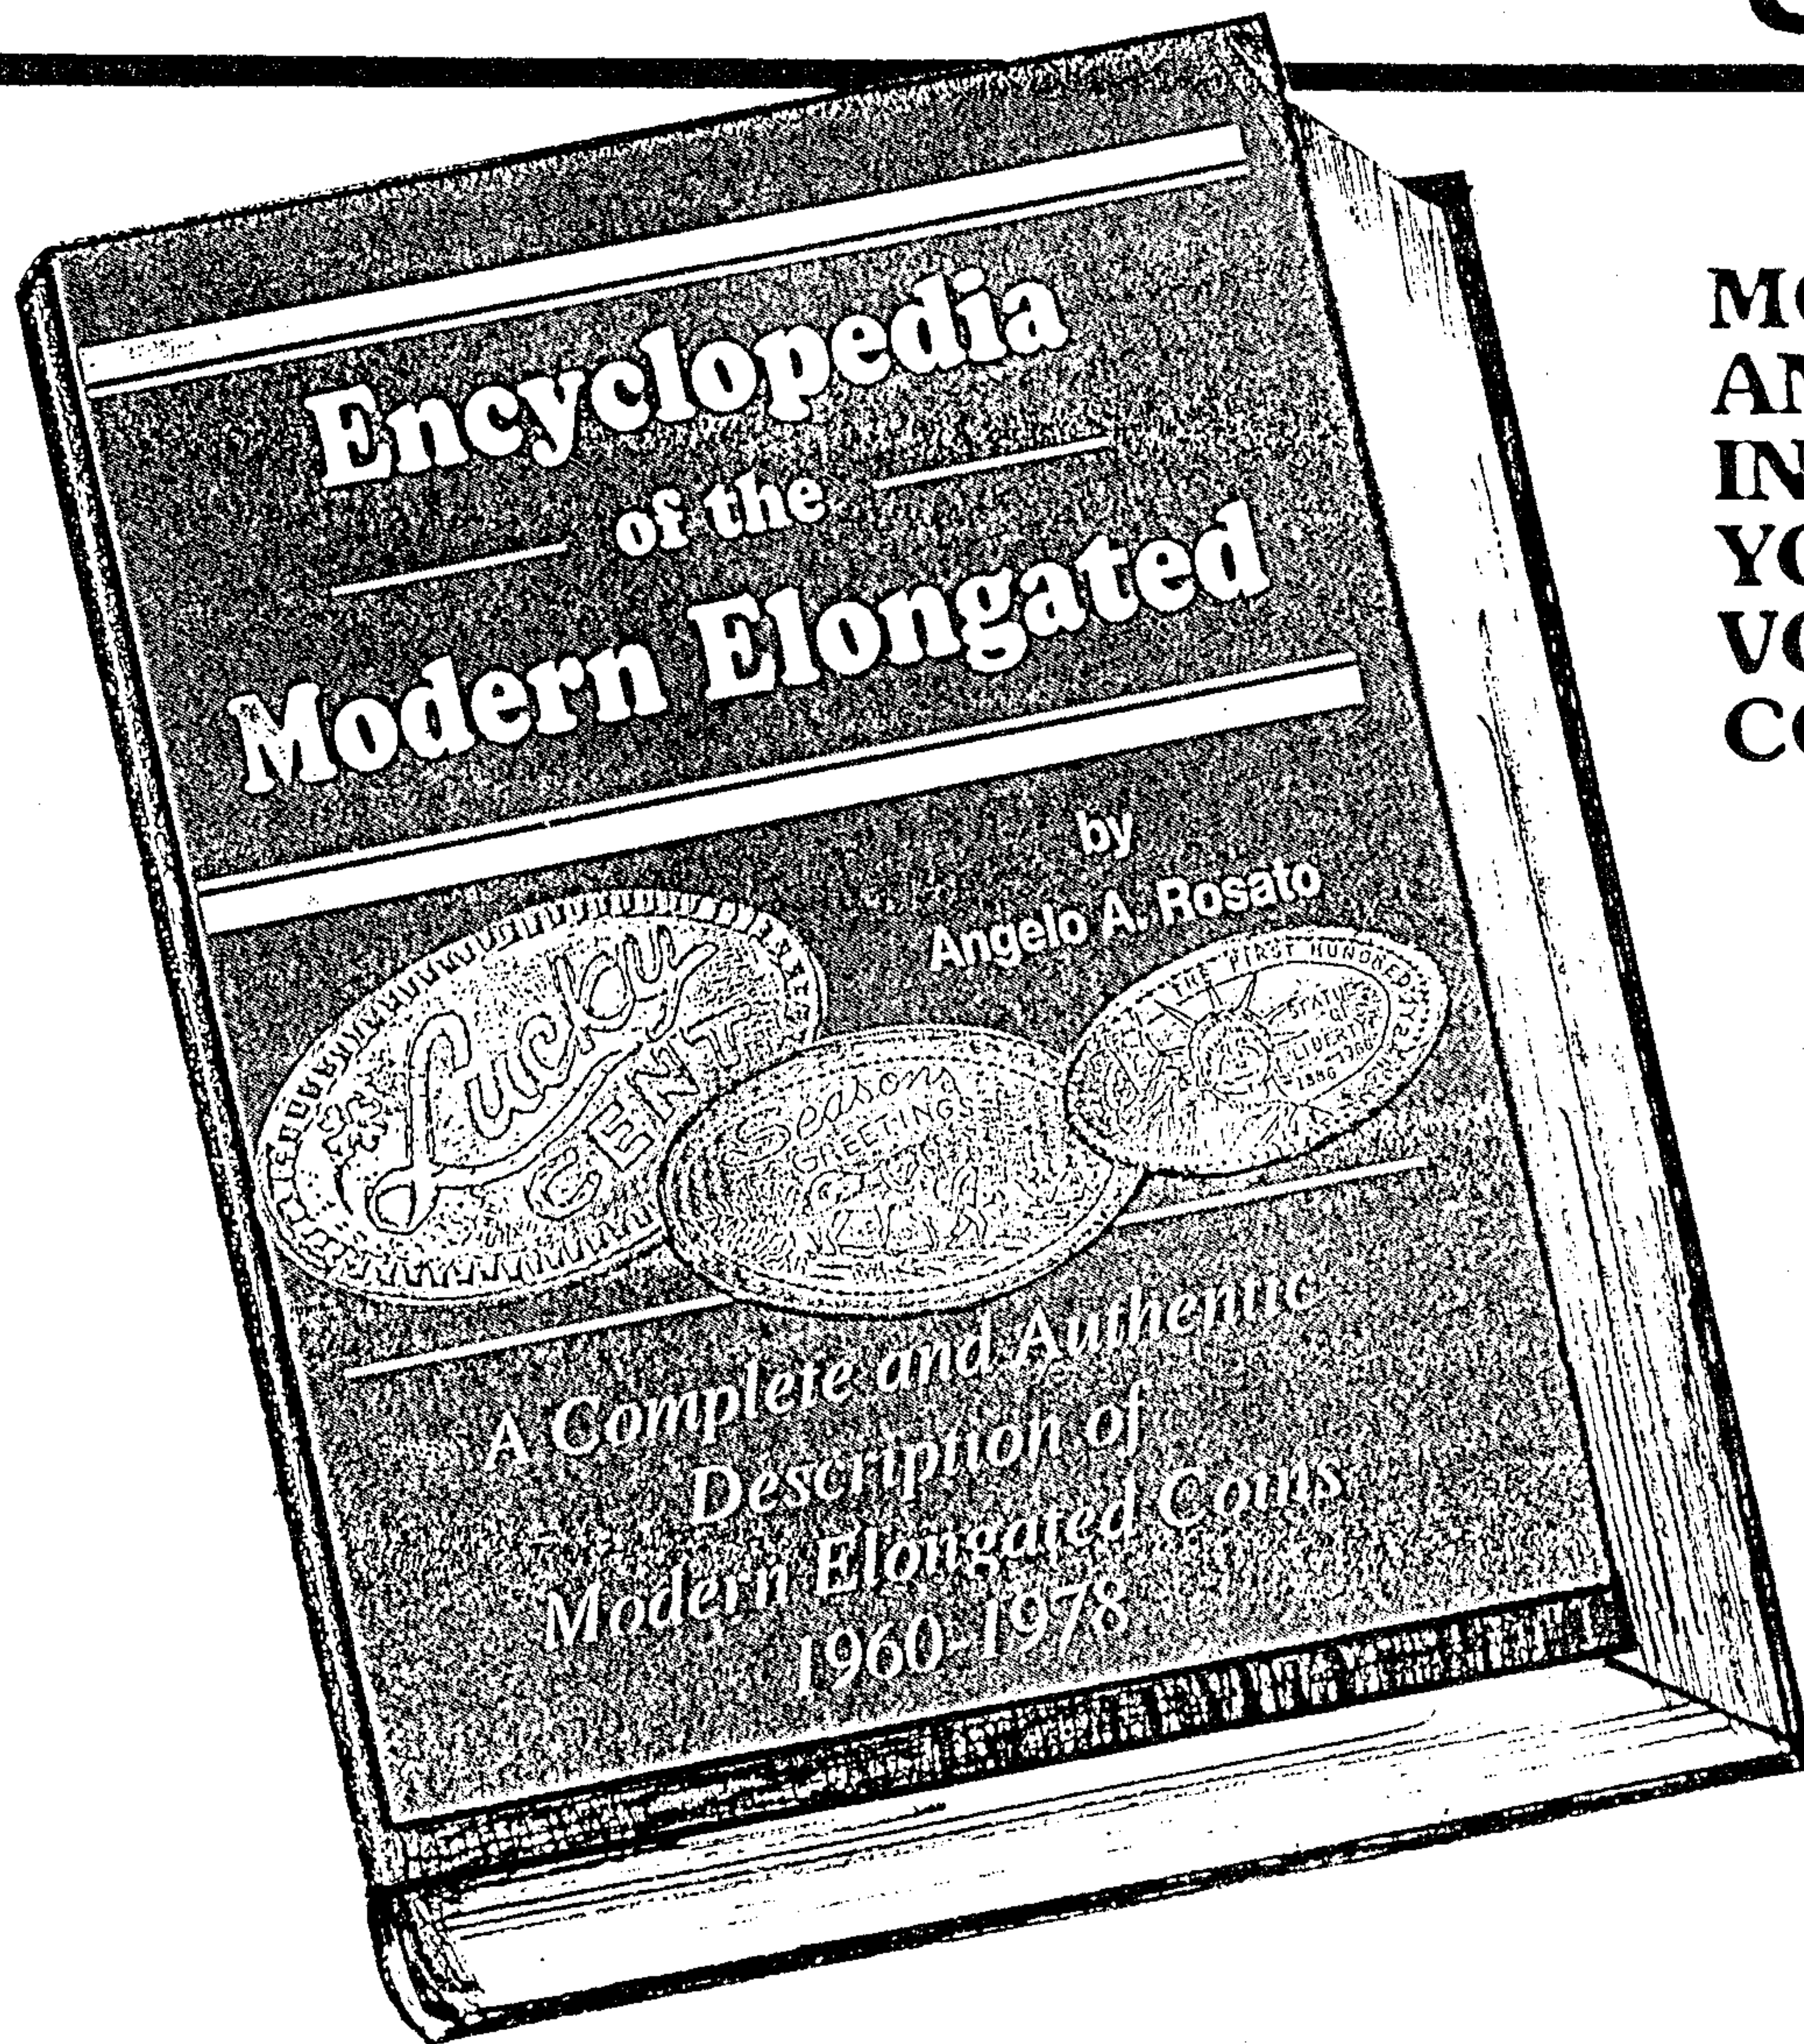

Books are not easily written. They represent months into years of diligent research. With historic value at hand there was no recourse but to forge ahead. The volumes represent answers to the most of obscure questions. With the everyday pursuit of the hobby, the hobbyist must consider the books as the fundamental provenance for knowledge. Those who have taken on the responsibility to record the information, or a segment of consequential data, have been compassionate for the essential need for knowledge. Thus, through a book, no matter of its size, scope or amount disbursed, a serious elongated collector can become aware, enlightened and free of obscurantism. Moreover, keep in mind a real book is not one we read, but one that read us!! - Books... they truly are the key to knowledge!! There is a favorite quote: *"It is a good book when opened with expectation and closed with profit."*

**MORE FEATURES
AND MORE
INFORMATION THAN
YOU'LL FIND IN 5
VOLUMES
COMBINED**

Suddenly,
here's a bright
new world of
collecting
alternatives
before you!

THE "NEW AGE" OF COLLECTING ELONGATED COINS

by Angelo A. Rosato

Yes...., welcome to the "NEW AGE" of collecting elongated coins!! Now there is a new book covering almost three decades of modern elongated coins. Previous books have had very little by way of the productions of modern specimens rolled beginning in the early 1960s.

Therefore, if you have had or presently have a nagging problem of not knowing how to, or where to get, how to evaluate, or what to collect and don't know where to turn... now you can turn to the ENCYCLOPEDIA OF THE MODERN ELONGATED. The book is as big as its title and it

will help improve your knowledge and all of your collecting desires by bringing you a wide range of options in the world of elongated coins.

Here for the first time are the many new and exciting discoveries and information never revealed before! Here also is how the hobby of collecting elongated coins really works... how, too, this encyclopedia will provide new horizons as a hobby alternative to a "new age." YES...., in the world of modern elongated coins!

You will not only learn about modern elongateds but also other things in the hobby like...

Elongated Historical Origin / The First Souvenirs / How The Elongated Coin Concept Advanced / Charles F. Damm, the forefather of elongateds / How Elongateds Were Motivated By Events / Origin Of Rolling Machines / Rolling Dies / Engraving Procedures / Design Format / Anatomy Of Elongateds / Border & Edge Design / How To Identify Elongated Coin Producers / Who The Dealers Were / Subject Matter / Advertisement On Elongateds & The Law / Progressive & Short Run Varieties / Which Were Limited Productions / How To Evaluate Your Modern Specimens / Learn About Restrikes & Rerolls / How To Separate Look-Alike Duplicate Specimens / Learn How Some Modern Elongated Coins Are Worth More Than The Price Of the Book / Over 100 (oldies) Elongated Specimens Illustrated and Described Never Listed or Recorded Elsewhere... and you also can become learned in more than 400 other facets associated to the elongated coin in a beautiful bound "Library" hard cover book encompassing 1760 PAGES!!! -- Send for your copy today -- Order form below.

There is no other book really like it in print today !!

With this book, the enthusiastic hobbyist will get to know all there is to know about both the old and modern elongateds - A truly comprehensive, up-to-date encyclopedia about elongated coins; and more importantly, a precious hobby reference... an elongated book which is destined to become a "CLASSIC" and "Standard Reference!" The encyclopedia is a book in which collectors of elongated coins have reached for many times... but, until now, have never been able to find!!

FREE: OVER \$100 BONUS GIFTS WITH PURCHASE

☐ YES... I am interested in a copy of the "ENCYCLOPEDIA OF THE MODERN ELONGATED." Please rush me information about the book and details about the \$100 FREE BONUS GIFTS with purchase. Also, if ordered by SEPT. 15th 1992, (as an extra bonus), I will receive an elongated coin valued \$25 or more.

Jones Elongated Inventory Purchased

Rocky Rockholt of San Antonio, Texas and White Bear Lake, Minnesota announced that he has purchased the entire inventory, dies and machinery Once used by Ralph Jones in producing elongated coins.

Ralph Jones was a "roller" of elongated coins in the early 1960's and up to about 1972. Jones' dies were hand engraved by two different engravers and the resulting elongated coins have unusual three dimensional effects that are not generally achieved today. The finished product has been proclaimed as some of the most beautiful elongateds ever created. The dies were quite costly when made at the time and today would be almost cost prohibitive to reproduce.

The most outstanding coins produced by Jones was his Presidential Series of 35 different Presidents complete through Lyndon B., Johnson. His zodiac designs are also very attractive. The complete series of dies includes 75 different designs.

Rockholt stated that he will sell out the existing inventory and then begin to market the elongates in his direct mail business.

For details of the elongates available contact Rockholt at 2678 Sumac Ridge, White Bear Lake, Minnesota 55110-5646 or telephone 612/777-9000.

Designing Your Own Elongated Coin, cont.

★ Unless the event is strictly a one time affair, make the coin design as generic as possible and dateless. If it is to be date specific, i.e. a one time date sensitive event, then, of course, include the date. Remember, you can have the year date on the reverse of the elongated coin used.

★ Send a pencil sketch of what you desire to the die maker who will advise you on layout, set-up, and so forth. Usually the die maker will complete the design and send you the proposed artwork for approval before rolling.

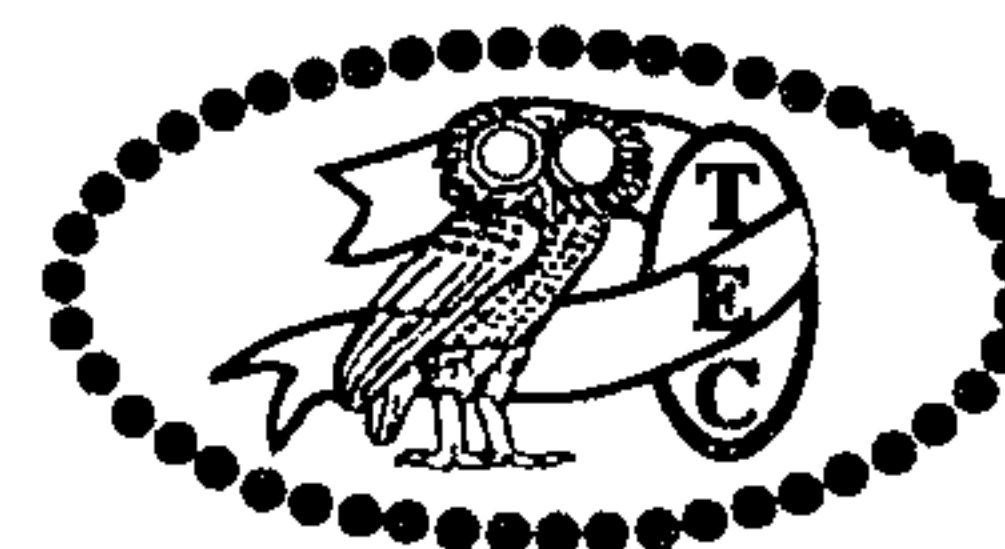

★ You can save the artwork cost by completing the design yourself. Use stick-on letters which can be purchased at an art store or office supply business. Letters of 42pt., 36pt. or 30pt. show the best. The die maker can provide a blank oval layout on 8 1/2 x 11" paper with a variety of borders for you to design on. A glue stick, scotch tape, white-out, scissors and clear sharp reproductions are essential to producing good camera ready copy. Be creative!

★ It costs approximately \$80.00 to get an elongated coin die cut and up to 250 cents rolled. Additional coins are approximately \$15.00 per 100.

★ The steel roll itself cost \$35 to \$40.00, if you desire to own the roll and die. If not the die maker retains possession of the steel roll and will use the other three spaces on the roll for other dies.

★ Spray your coins immediately with clear acrylic to retain their bright metal appearance indefinitely. Make presentation cards using reduced size artwork and some inventive photocopying on colored cover stock. These touches really set off your coin.

★ Let other know of your accomplishment by writing an article for *TEC News* and you can also place a Free ad to sell or trade your newly designed elongate.

ADVERTISING DEADLINE
